

# Geisinger

Greetings!

The Department of Oral Medicine and Maxillofacial Surgery at Geisinger Health System is currently accepting applications for student externship positions. The program will allow students to participate as a member of the OMS team with exposure to the full scope of the specialty including: dentoalveolar surgery, ambulatory outpatient anesthesia, craniomaxillofacial trauma, orthognathic surgery, surgical and non-surgical management of TMD, surgical management of obstructive sleep apnea, multidisciplinary care of cleft and craniofacial patients, benign/malignant pathology, and reconstructive surgery.

The OMS extern will be exposed to both clinical and didactic training opportunities to further their knowledge and experience in the field. This is an excellent opportunity for students to gain valuable experience and support for application in the upcoming residency application cycle. Student externships are available for 1 to 4 week periods.

Interested applicants are encouraged to visit the Geisinger OMS residency website for further information and application for the externship experience.
